Continuing Education

Provider approved by California Board of Registered Nursing contact hours and AZDHS approved for EMS providers.
UofA CME for Physicians - Office of Continuing Medical Education

Faculty & Instructors

Dale Woolridge, MD/PhD

EPICC Coordinator.
Director of Southern Arizona Children's Advocacy Center. Director of Combined Emergency Medicine/ Pediatric Residency at University of Arizona. Associate Professor, University of Arizona, Department of Emergency Medicine & Department of Pediatrics. Combined Emergency Medicine/Pediatrics Residency at University of Maryland Medical Ctr.

Ricardo Samson, MD FAAP

Chief, Cardiology Section, Professor of Pediatric Cardiology at UAHN Pediatric Department. Practicing pediatric electrophysiologist and interventional cardiologist. Associate Science Editor for the 2010 AHA PALS Guidelines.

Terrence O'Keefe- MB, ChB, MSPH

Assistant Professor, University of Arizona Department of Surgery, Division of Trauma Surgery. Medical Director of the Surgical/ Trauma ICU. Completed Trauma Fellowship at Ryder Trauma Center in Miami, FL.

Angelique Ferayorni, DO

Associate Professor, University of Arizona Department of Emergency Medicine. Completed Pediatric Residency, Chief Residency and Pediatric Emergency Fellowship at Phoenix Children's Hospital.

Taylor Payson,

EPICC Coordinator
Executive Director
Southeast Arizona EMS Council

Aaron Leetch, MD

EPICC Coordinator
Fourth year resident in the University of Arizona Emergency Medicine/ Pediatrics Residency.
Co-author of the Neonatal Resuscitation chapter of ACEP book Emergency Department Resuscitation of the Critically Ill.

Spencer Greene, MD

Assistant Professor of Emergency Medicine, Section of Toxicology at UAHN Emergency Department. Director of Medical Toxicology Fellowship at UA/UPHK in Tucson, AZ. Completed Toxicology Fellowship at Banner Good Samaritan Hospital in Phoenix, AZ.

Lawrence DeLuca, MD, EdD

Associate Professor, University of Arizona Department of Emergency Medicine. Completed Emergency Medicine residency and Critical Care Research fellowship at University of Arizona with a focus on early recognition and management of shock

Scott Lowry, MD FACEP

Mid-level Medical Director, Tucson Medical Center - SWEA. Completed Emergency Medicine residency at University of Arizona with a focus on advanced airway management and difficult airways.

Mary McDonald, BSN RN

EPICC Coordinator
UAMC - South Campus
Base Hospital Manager

EPICC

Emergency Pediatric Interdisciplinary Care Conference

of Southern Arizona

Available through the American College of Emergency Physicians, the American Academy of Pediatrics

**February 18th, 2012
Morning**

**Registration - Sign In 0730
Welcome - 0745**

0800-0850 Aaron Leetch MD

"Management of Unruly Fetuses: Pre-Term ED Delivery"

- I. Describe appropriate preparation for a preterm delivery
- II. Rapidly recognize an impending preterm delivery
- III. Review recent guidelines on preterm/difficult deliveries
- IV. Describe appropriate "packaging" of a preterm infant prior to transfer to a tertiary care center

0900-0950 Angelique Ferayorni DO

"Pediatric Orthopedic Emergencies"

- I Identify common pediatric traumatic injuries
- II Identify pediatric orthopedic emergencies
- III Identify - classify fracture patterns in growing bones
- IV Know which injuries require admission or the help of an orthopedist

1000-1050 Terrence O'Keefe MB, ChB, MSPH

"Pediatric Head Trauma: To Image or Not to Image."

- I. Describe patterns of pediatric head injuries.
- II. Review pre-hospital management of pediatric head injury
- III. Discuss the evidence for "Low Risk" head injuries in children that may not require CT scans
- IV. Review current management of intracranial hemorrhage in children

1100-1150 Scott Lowry, MD

"Management of the Pediatric Airway"

- I. Describe preparation for successful pediatric intubation
- II. Recognize a difficult pediatric airway and review methods to prevent intubation in children in respiratory distress
- III. Discuss management of a failed pediatric airway
- IV. Review the options of difficult airway devices in children.

**February 18th, 2012
Afternoon**

Lunch - 1200-1300

1300-1350 Spencer Greene, MD

"Drugs and Stings in Tots and Teens"

- I. Describe features and management of common exploratory ingestions
- II. Review the management of scorpion envenomations
- III. Provide an update on common recreational drugs
- IV. Discuss potential toxicologic hazards found around the house

1400-1450 Dale Woolridge, MD/PhD

"Turning Over the Rocks: Identification, Treating and Processing Pediatric Victims of Abuse."

- I. Improve identification and evaluation of pediatric abuse
- II. Improve examination skills and techniques on pediatric abuse victims
- III. Improved understanding of disposition strategies to ensure ongoing safety for abuse victims.

1500-1550 Ricardo Samson MD

2010 PALS & Congenital Heart Disease Issues in Resuscitation

- I. Define changes in 2010 PALS guidelines and exceptions to "CAB" for children
- II. Describe history and physical exam findings that must be examined in patients with known congenital heart disease
- III. Review initial stabilization of newly diagnosed congenital heart disease

1600-1650 Lawrence DeLuca, MD

"Pediatric Shock:- Early Intervention and Management."

- I. Discuss early recognition of shock in infants and small children
- II. Review current management of undifferentiated shock
- III. Describe appropriate implementation of pressor therapy in unresponsive shock
- IV. Review recent evidence questioning the use of large volume resuscitation in pediatric shock

Course Evaluations & CE Handout

**Sunday, February 19th, 2011
Optional**

Day Two - Simulation Lab

Registration - Sign In

Day 2 (Optional) - Simulation Lab

- I. Put your new found pediatric knowledge to work on high-fidelity pediatric simulators.
- II. Experience multiple cases from pre-hospital to ED management that reinforce the previous day's objectives.
- III. Practice pediatric intubations, access and team resuscitations with pediatric emergency specialists.

Six Stations Including:

- ◆ Pediatric Airway Management: Tricks of the Trade
- ◆ Neonatal resuscitation
- ◆ The Acutely Poisoned Patient
- ◆ Pediatrics Access: Intraosseous to Umbilical Access
- ◆ Pediatric Shock
- ◆ The Head-Injured Child

The simulations on Day 2 provide real application to solidify the concepts taught on Day 1.

More details to follow for those who register for Day 2.

Space is limited to 30 paid participants, so register early.
